PROFILE

I am a web developer who is passionate and looking forward to learn. Deep knowledge of major web techniques like Java , HTML, CSS , bootstrap, JavaScript and React js along with I am also interested in frontend and user interface development.

EXPERIENCE

Frontend Developer internship   **Oct - Dis 2023**

- The primary focus of my internship was to enhance the user experience and interface of the AiSenseLLp. I collaborated with a dynamic team of developers to implement modern frontend technologies and design principles. technologies at React, Bootstrap, Material UI, and Tailwind CSS.

ACADEMIC PROJECTS :

PORTFOLIO

- Welcome to my project portfolio website! As a dedicated front-end developer, I've crafted this website to showcase my skills and highlight the projects I've worked on. Through this project, I've gained valuable insights into the world of web development, honing my abilities in HTML, CSS, and JavaScript. This journey has provided me with practical knowledge of front-end design principles, responsive web development, and creating engaging user experiences.

Ecommerce

- The e-commerce project aimed to provide a seamless and enjoyable shopping experience for users across various devices. The integration of React and Bootstrap played a pivotal role in achieving this goal.
